Sun Light Energy, Just
Like a Real Plant !!

Congratulation ! You are the new owner of Hana Hana Mi ~ An electronic flower that needs your special cares and nurture for his / her healthy growth. Please read the following instructions to learn how to take care of this special flower and let's plant right away!

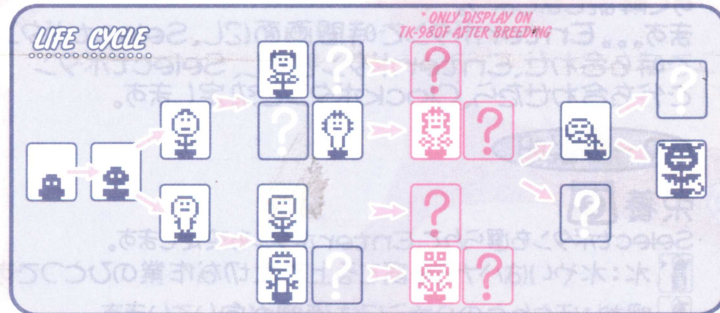

Before game start ~ To activate Hana Hana Mi, remove the plastic tab at the side of the unit.

- Setting the clock ~ 1) Once the plastic tab has been removed, the unit will be in the CLOCK MODE.
2) Press **CLOCK** to enter CLOCK SET MODE. The hour will then begin flashing.
3) To set the current hour, press the **SELECT** selection key until desired hour is displayed.
4) To set the current minutes, press the **ENTER** key. The minutes will then begin flashing. Press the **SELECT** key until desired minutes are displayed.
5) Press **CLOCK** when you are done.

Note ~ If the **ESC** and **ENTER** buttons are pressed simultaneously the unit will enter the CLOCK SET MODE.

LCD Screen ~ The LCD screen is the living place of HANA HANA MI. Press the **SELECT** key to light up the icons around the outside of the screen. These icons represent all the different activities that allow you to interact with HANA HANA MI.

How to play ~ To plant HANA HANA MI properly, you have to figure out what he / she needs at different times. Use the **SELECT** key to move to the activity you want to choose and press **ENTER**.

NUTRITION

When you select this icon, you will be given two nutrients to choose from, press the **SELECT** key to switch between water and fertilizer, then press **ENTER** to nourish HANA HANA MI.

SUN BATHING

Besides nutrition, sunbathing is essential for HANAMI's health. After this icon is selected, you have to place HANA HANA MI vertically towards a light source for 1 minute. If the light intensity is adequate, you will see HANAMI's happy face. Otherwise, he/she will look unhappy. When time is up, a "beep-beep" sound will play to remind you, and you have to press the **ESC** key to finish this activity. If HANA HANA MI is over exposed to sunlight, he/she will get angry.

MUSIC

When you see HANA HANA MI gets angry or unhappy, let him/her listen music by selecting this icon.

INSECTICIDE

HANA HANA MI will be infected by pest sometimes. Select this icon to spray insecticide for pest-control. If you don't care about this, he/she may die from disease.

TRIMMING

When there is weed growing out from HANA HANA MI, select this icon to trim it out.

ALERT

When HANA HANA MI needs something, it will alarm you by special sounds. You should then check from the report what it wants.

GAME OVER

The game is over when HANA HANA MI dies. It can die from old age, or bad health. If you do not take good care of it.

SOUND

To switch sound on/off in game mode (when no activity is on), press and hold the **CLOCK** and **ESC** keys at the same time for 3 seconds.

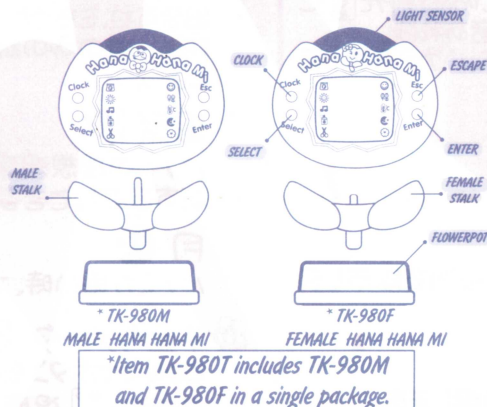

RESTARTING THE GAME

If the game is over, or if you want to restart the game, press the **RESET** key at the back of the unit.

INSERTING THE BATTERIES

To insert the batteries, unscrew and remove the battery compartment cover at the back of unit. Insert two AG13 button cell batteries (batteries included), making sure to align "+" and "-" as shown.

GAME DESCRIPTION

GAME

To keep HANA HANA MI happy, you should play with it often. Select this activity to play - "Bees-catching" game. When the game starts, you will see bees flying down from different positions. Press the **SELECT** and **ENTER** keys to move the flower pot to the left and right to catch as many bees as possible.

SLEEP

Select this icon to let HANA HANA MI take a good sleep at night.

BREEDING

When HANA HANA MI reaches the mature stage (about 9 days after the game started), this icon will stay lite for selection, and he/she is ready for breeding. Select this icon and press **ENTER**. You will see a standby picture flashing on screen. Remove the stalks from the male and female HANA HANA MI and insert the male stalk to the female unit to let the breeding proceed. A new HANA HANA MI will born on the female unit after the process finished, and you have to take care of it as usual.

AIR-CONDITIONING

The optimum temperature range to HANA HANA MI is 25 to 30 degree. Too cold or too hot will make it uncomfortable and get sick easily. When HANA HANA MI feels cold, it will shiver, and when it feels hot, you will see its angry face. Try to keep the optimum temperature by turning on/off the air-conditioner and let it have a nice environment.

REPORT

Choose this icon to check on HANA HANA MI's progress. Press the **SELECT** key to display screens showing the current day and height, temperature, care, nutrition, water, and sunlight energy. You can determine from these statistics what HANA HANA MI needs, and take care of it right away.
